

"Lost or stolen, or wandered away, A heart that was light as a feather, Buoyant and free, and bright as the day, No matter what kind was the weather. Helio, little maid, I won't be rush—
If you are a thief you don't look it;
But, as my heart went off like a flash,
I—sort of—lunagined you took it.

"Now I hate to believe that a face, The angels might covet for beauty,
Would be linked with so deep a disgrace,
And yet, to believe is my duty.
Fact is, my heart went just as you came;
A moment before it was sleeping.
Own up at once your part in this game—
I'm certain the thing's in your keeping.

"You won't give it back? well, now that's Some folks would make quite a case of it! Some force would make quice a cost of the But lit for tat's a very good cule.

And I'll just take yours in place of it."
He did, and the end's not hard to tell—
"Twas an easy way out of the bother.
They tramp through life tow, happy and well,
While each keeps the heart of the other.
—William Lyle in Boffalo Express.

A PASHA'S SNUFF BOXES.

Some half a dozen years previous to the sudden collapse of the Napoleonic dynasty, in 1570, a certain sensation was excited in Paris by the arrival in that city of an oriental potentate of ambiguous nationality, but popularly known and spoken of as "the pasha." Whether he came from Turkey or from Egypt was regarded as a matter of comparatively small importance; the two essen tial points in his favor were, first, that he was undoubtedly the possessor of an immense fortune; and, secondly-no slight recommendation in the Lutetian capital-that he spoke French with tolerable fluency. As a matter of course so desirable an acquisition to Parisian society became the lion of the hour, and no sooner was it ascertained that a spacious hotel overlooking the Park de Monceaux had been engaged and furnished for the reception of his excellenev and suite than a shoul of visitors. official and non-official, hastened to inscribe their names in a book deposited for the purpose in the porter's lodge. Every day brought a fresh installment of signatures, until before a week had elapsed the list threatened to rival in length the traditional catalogue of Lepo-

Hussein Pasha-an assumed title, I fancy, but the only one by which he was generally known-was short and corpulent, of sallow complexion and reserved manners: hespoke little, but what he did say was concise and to the point. He was extremely observant, but chary of expressing his opinion of what he saw or heard-only one instance being recorded of a temporary departure from his habituni taciturnity. Having been persuaded by a member of the French Jockey club to accompany him to the opera, he was escorted between the acts by his cicerone to the foyer de la danse, thereby occasioning great excitement among the corps de baffet, many of whom doubtless anticipaled that, in accordance with eastern customs, the ceremony of throwing the handkerchief would be revived for their own especial glorification. Nothing of the sort, however, occurred. After a very cursory glance at the assembled sylphides and a muttered ciaculation which sounded remarkably like "mances a balai" (broomsticks), the visitor turned abruptly on his heels and curtly intimated his desire to return to his box.

A few minutes later Count startled by a sudden display of animation on the part of his companion, who was gazing with absorbed attention at an enormously stout lady occupying the entire front of one of the stage boxes.

"Ah, la belle femme!" enthusinstically exclaimed the pasha. "Look, is she not

superb?" "H'm!" replied the Jockey club exquisite, har by able to repress a smile, "that is a matter of taste. Does not your excellency think her perhaps on the whole a trifle too voluminous?

"Jamuis trop, monsieur!" indignantly retorted Hassein, "jamais trop!"

After a sejourn of three months in Paris the pasha, who had employed a considerable portion of his time in a practical study of the latest inventious and improvements, scientific and mechanical, with the view of introducing them into his own dominions, announced his intention of breaking up his establishment and returning to the east. Before doing so, however, he was desirous of expressing his acknowledgments in the shape of a suitable present to certain officials of bigh standing who had been particularly services de to him in his researches, and consulted his secretary, an intelligent young Frenchman, on the

"M. Morin," he said, after explaining his project, "it seems to me that the simplest way would be to send a few thousand france to each of them,"

"Parsion me, your highness," objected the secretary, "if I venture to remind you that a present of money would be considered a breach of eliquette and consequently resented us an insult."

"You French are very singular people," observed the paska. "With us no mutter how rich a man may be, he is not fool enough to refuse plasters when he can get them. What, then, would you ad

"May I be allowed to suggest," re-

"Safe and Certain'

S the testimony of Dr. George E. I Waller, of Martinsville, Va., in reference to Ayer's Pills, Dr. J. T. Teller, of Chittenange, N. Y., says :-

"Ayer's Pills are highly appreciated. They are perfect in form and coating, and their effects are all that the most careful physician could desire. They have supplemented all the pills formerly popular here, and I think it must be long before any other can be made that will at all compare with them. These who buy Ayer's Pills get full value."

who buy Ayer's Pills get full value."

"I regard Ayer's Pills as one of the most reliable general reaccides of our times. They have been in use in my family for various affections requiring a purpative medicine, and have given unvarying satisfaction. We have found them an excellent renewy for colds and light fevers."—W. R. Woodson, Fore Worth, Texas.

"I mesoribe Ayer's Pills in the same of the man excellent renewy for colds."

"I prescribe Aver's Pills in my practice, and find them excellent. I their general use in families." -W. Brown, M. D., Oceana, W. Va.

Ayer's Pills,

Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists and Dealers in Medicine plied Morin, "that an object of artistic value would be a fitting token of your highness' good will—a gold snuff box, for instance.

"The very thing," said Hussein, ap-"Where are such articles to provingly.

"At Dorr's, in the Rue de la Paix." "Good. Let him know exactly what I require, and see that he is here precisely at 12 to-morrow,"

On being admitted to the pasha's presence at the appointed hour, M. Dorr produced, among other specimens of his handiwork, a gold snuff box, exquisitely finished, and encircled with moderate sized diamonds, the interior of the lid bearing the jeweler's name engraved in microscopic characters. Hussein examined it minutely and inquired the

"Four thousand francs, your highness, replied Dorr. will take it on condition that you engage to supply me with seventeen

other boxes exactly similar to this." "Impossible, monseigneur," said the jeweler; "I have only six of this pattern in stock. Still," he added, after a moment's reflection, "I might perhaps be able to manage it. May I ask how soon your highness intends leaving Paris?"

"In a fortnight from today, "That will be quite sufficient. The six snuff boxes shall be distributed immediately. In a few days six more will be ready, and I think I can promise the remaining five before the time fixed for your highness' departure."

On the following day the six boxes, each accompanied by a complimentary letter, written by Morin and signed by the pasha, were duly transmitted to the privileged individuals heading the list. Toward the end of the week the jeweler reappeared according to promise with a second installment of another half dozen, which were also forwarded to their destination; and before the fortnight had expired five more snuff boxes were in his highness' possession.

The pasha expressed himself perfectly satisfied with the prompt execution of his order. "It is evident," he said, "that the recipients of my gifts are highly pleased, for I have received the most flattering letters from all of them except

"Except one, did your highness say?" anxiously inquired Dorr.

"Yes. My secretary informs me that one of the gentlemen at whose house my present was left is absent from Paris, which accounts for his silence, and that he is not expected back until Sunday, the day after my intended departure. But," continued the pasha, "how is this, M. Dorr? You have brought me only five boxes. Where is the sixth? It is absolutely essential that no one on my list should be neglected."

"Your highness may rest assured that your orders will be implicitly obeyed," replied the jeweler. "If M. Morin will kindly acquaint me with the name and address of the person for whom the box is destined it shall be delivered to him Wednesday without fail.'

"Exactly similar to those, of course," "I can safely guarantee, monseigneur, that there will not be a shade of difference between them."

"Very good," said the pasha; "I rely on your punctuality. My secretary will pay you the 72,000 francs, and on my next visit to Paris you will probably hear from me again. Au revoir, M.

If any one endowed with the peculiar faculties of Asmodeus had penetrated some ten evenings later into the small room forming the back shop and private sanctum of the well known jeweler of the Rue de la Paix he would have been enlightened as to certain supplementary adjuncts to the ordinary business carried on by M. Dorr. He would have seen nothing in common between the two lies in Popular Science Monthly. that estimable tradesman seated at a minds. table on which were lying six gold snuff boxes bearing a suspicious resemblance to those recently purchased by his highness the pashs, and carefully polishing lady, generally white haired, with kind- may be taken as coming from an expert, each in turn with a silk handkerchief.

"They all come back to me again, every one of them," muttered M. Dorr, all her attractiveness. Note how the boys given from the same box from which with a self satisfied chuckle, while deli- and girls adore her; they will go to her was sent out the alarm for the great fire cately removing a speck of dust from and confide their sorrows, their hopes, in 1872, which also began in Kingston the last of the half dozen. "No one ever their ambitions, even when they would street, then occupied by small dwelling keeps them long, for snuff boxes are not breathe a werd to their mothers. houses. In just one minute from the locked up capital, and everybody, from The kindly, living interest in a lad's af-Napoleon downward, knows the value of fairs by such an one has time and again the spot, but the flames had burst from ready money. They discover my name first implanted the impulses in his heart inside the box and naturally bring it to me, and, as I treat them liberally, I am able career. Quickly, almost by stealth, safe to see them again. A very fair fortnight's work. I must say," he added. consulting an open account book, in which the following statement was legibly inscribed:

To sale of eighteen gold snuff boxes

Deduct from above commission to secretary ("Sharp fellow, that, by the way," parenthetically solilo-quized M. Dorr) at 50 francs per box To requirehase of eighteen gold shuff boxes from their owners at 2,000

"Not to mention," pleasantly summed up the jeweler, "that the snuff boxes are ready for a second edition of the little game whenever another pasha happens to come this way."-Charles Hervey in The Argosy.

Move to Save the Buffaloes.

The next legislature of Wyoming will pass a law making the killing of a buffalo a misdemeanor. An act to this effect is not required to protect the buffaloes as game, for the hunter would buffaloes in vain. It is intended to imply to the men who lie in wait and shoot own the buffaloes that happen to stray off the reservation in the Yellowstone park, where a few relies of the bygone race are preserved. The dead buffalo brings its slayer \$200 and the temptation to kill them is a strong one for the hunter.-Exchange.

About Stanley's Hair.

The correspondent who went up country to meet Stanley describes his hair as being quite white. This he ascribes to the privations of the expedition. But e who met Mr. Stanley when he was formerly in this country will be reminded by the telegrams of an incident regarding which the great explorer was some years ago twitted by his friends. As a matter of fact, his hair had become white long ago. But Mr. Stanley did not appreciate the venerable appearance which his gray locks gave him. They became black again a good deal more suddenly than they had grown white. In view of the chance of another curious change of this kind, it is rather awkward that their present color should of such a curiosity, exerted themselves have been so universally made known. to render their capture a certainty. FREAKS OF FASCINATION.

nately, Tastes Differ

Dame Nature plays strange freaks with men's minds. If one of the many enterprising newspapers of the day was to inaugurate a competition in which every man had to give an accurate description of the kind of woman most prone to fascinate him, many readers would, I think, be astonished. Noah Webster's definition of the word

fascination is, "The exercise of a powerful or irresistible influence on the affecplicable influence, witchcraft, enchantment." In the words "inexplicable influence" the learned doctor seems to shed. have summed up neatly the whole question. Who can explain what is frethe one will find a woman irresistibly fascinating, while on the other she of putting his best leg forward and making a bolt, circles round the snake, which he knows only too well intends to make | make decided objections. a meal of him.

The First Lightning Sod.

Everybody believes that Franklin was the inventor and constructor of the first lightning rod. In this one particular everybody is mistaken. The first lightning catcher was not invented by the great philosopher, but by a poor monk of Seuttenberg, Bohemia, who put up the first lightning rod on the palace of the curator of Preditz, Moravia, June 15, 1754. The name of the inventive monk was Prohop Dilwisch. The apparatus was composed of a pole surmounted by an iron rod, supporting twelve curved hunt the mountains and plains for wild branches and terminating in as many metallic boxes filled with iron ore and inclosed by a wooden box-like cover, traversed by twenty-seven iron pointed rods, the bases of which found a resting place in the ore box. The entire system of wires was united to the earth by a large chain. The enemies of Dilwisch, jealous of his success, excited peasants of the locality against him, and, under the pretext that his lightning rod was cause of the excessive dry weather. had the red taken down and the inventor imprisoned. Years afterwards M. Meisen used the multiple pointed rod as an invention of his own.—St. Louis Re-

Hew Not to Hold a Sea Lion.

Yesterday morning the crew of an Italian fishing smack, named the Glorietta, captured a sea lion inside the Heads. It was a monster and must have been asleep, or else the fisherman could nover have slipped a noose about its flippers and fastened it in such a manner that all the efforts of the seal to escape were ineffectual. The Italians, thinking of the future riches which would flow to them from the exhibition

much labor they shipped their prize and finally made fast to Fisherman's wharf about 10 o'clock, with the sea lion quietly ettled in the hold of their little craft. The news of the advent of the little stranger drew a large crowd to the wharf, and much speculation was in-dulged in as to the best manner of get-

ting the captive ashore. Thomas Gilligan, who is now collector at the wharf, was one of the most active in giving advice, and, being some sort of an officer, his opinions were listened to with great deference. The time came when the sea lion had to be taken ashore, tions and passions," and he gives as and the Glorietta was brought to the insecondary explanation, "Unseen, inex- cline inside the dock, and active preparations were made for a transfer of the sea lion from the hold to the fisherman's

Collector Gilligan was the self arpointed director of the proceedings, and quently the case, that of two men of as he it was who carefully inspected the nearly as possible the same cast of mind, loop which secured the sea lion, and he it was who shouted "all ready" when a dozen of the brawny hishermen took hold might not exert the slightest attractive of the ropes and tried to persuade his influence? Such a problem is as hard to marine majesty to crawl up the incline solve as why the guileless rabbit, instead to a place out of the wet on top of the wharf. The sea lion about this time began to take in the proceedings and to

He evinced a very mulish disposition The wise heathen Aristotle said: "No not to be urged, and displayed such a man loves but that he is first delighted temper that the men on the rope determined to keep at a safe distance. The is for the most part the bait which lures efforts of a dozen were, however, too a victim into the meshes of the snare, much for him, and they had drawn him but not always." Dr. Webster, too, almost to the top when he made an unseems to imply by his definition that in expected flop and nipped the fisherman

All of us have seen the old the recent conflagration in Bostion, which ly, pleasant features, on which time has and mentions a few interesting points. set no unfriendly mark, who still retains It is curious that the first alarm was striking of the alarm an engine was on every window in the building, the Brownwhich eventually led him on to an honor- Durrell store, before a line of hose could be laid. In a few moments fourteer the good is done by such, and the good more engines had arrived, but the heat of the fire was so intense that the solid streams of water from the hose turned On the other hand, we have most of into steam before they entered the winus seen, perhaps in real life, certainly on dows, and the engines might as well enslaves men's souls and leads them (on crossed the two adjacent streets. All in her old fashioned chair, and these two help was summoned by telegraph from and, notwithstanding the heavy rain which prevailed during most of the time, nearly seventy engines were assembled and pouring rivers of water on the fire before it was subdued.

To Utilize Wave Power.

A caveat for improvement in ocean wave motors has been filed with the commissioner of patents by S. A. Leffingwell, of Coronado Beach, through his attorney, Clara Foltz. The object of the invention is to convert the forces of the waves of the ocean into a motive power for driving machinery on shore for electric lighting, etc.

This is accomplished by means of a float placed in the open sea. In the float are tubes extending to a depth of thirty or forty feet below sea level, open at the bottom and closed at the top in such a manner as to retain a pressure of air. At the top of each tube is a valve opening to admit air into the tube and closing against an outward current. There is also a valve opening into a

pressure reservoir through which air may pass out, corresponding to the vale gear of an ordinary pump. By this arrangement air is pumped into the reservoir with a pressure suitable for driving an engine located on the float and connected with a dynamo converting the power into electricity. The electricity is transmitted by electric cable and used as a driving power, or otherwise, as may be desired. Experiments were recently made on the bey, with the most satis-

factory results. The machine, however, is intended for use in deep sea a mile from shore. Any amount of power can be had, according to the size of the plant used. The principle of the motor is practical and economical, and its inventor lives

The late J. Crossett, the independent American missionary, is described in an official communication to the state department at Washington, in the highest terms, as devoted to doing good to the poor: "He was known by the Chinese as the 'Christian Buddha.' He was attached to no organization of men. He was missionary, pure and simple, devoted to charity rather than proselytism. literally took Christ as his exemplar. Innkeepers would take no pay from him. and were ever glad to entertain him. "It must be said that his wants were

few. He were the Chinese dress, had no regular meals, drank only water, and lived on fruit, with a little rice or millet. He aimed at translating his ideal, 'Christ into reality.' He found good in all re ligions. After a long conversation with him one day, I told him he was not a Christian, but a Buddhist. He answered that there were many good things in Buddhism. He completely sacrificed himself to the good of the poorest of th poor. He acted out his principles to the end. He was poor and lived as plainly as the poorest of his patients. On charitable subjects he wrote well. The ideal to him was practical. Let this American be enshrined in the annals of men who loved their fellow men."-Hall's Journal of Health.
